## CONSUMER RIGHT TO KNOW!

**Petition to Secure the Mandatory Labeling of all Genetically Engineered Foods  
Submitted to the President of the United States, the Congress, the USDA and the FDA**

New substances are being introduced into our foods via a technology called genetic engineering. A growing number of scientists and physicians are voicing concern over the possible health risks from these foods. Current laws and policies do not require the food industry to label these new genetically engineered foods. Without labels consumers lose the freedom to choose what they will eat and feed their families. This petition upholds the right of consumers to make informed choices.

**We, the undersigned, as citizens of the United States of America, strongly urge the passage of legislation and policies to mandate the clear and accurate labeling of all foods derived from, processed with, containing or consisting of genetically engineered organisms before they are released into any and all commercial markets.**

**PLEASE PRINT CLEARLY**
